

An elementary school teacher and a graphic designer joined forces to create Space Blanket. An audiovisual project driven by the musical tastes of two men set off to make an audible cocktail.... Nu disco beats, dirty bass lines, french-style synths, guitar riffs and tricky vocals comprise the electro disco indie sound of Space Blanket. The music is dressed up with real-time visual projections created from scratch and manipulated in real-time during their live shows.

Do not expect an ordinary playback style performance...Stretch out and get ready to sweat.
